It is great if your site gets a beautiful theme but it is not enough for customer experience. User friendly is also important factor. Ajax Search Autocomplete and Suggest Extension for Magento 2 is one of the indispensable things that helps customer find what they need in the shortest way.

Although shop owner gets a powerful mega menu, but looking for suitable product will be quite difficult if they have a huge number of item. This extension brings Search function with auto complete and suggests, therefore this is a best tool to find product. With calling out suggested items, the system constantly shows results quickly with product's information on drop-down list. Your website is more friendly and convenient to make customers comfortable when purchasing products online.

➤ System Requirements:

* **Operating System:**

- Linux as RedHat Enterprise Linux (RHEL), CentOS, Ubuntu, Debian, v..v
- Composer (the last version)
- Apache 2.2 or > Apache 2.2

✓ Search with selecting category

3. Uninstall

✓ Step1:

- In admin panel, go to **Store** → **Configuration**

The screenshot shows the Netbase admin panel. On the left, a sidebar menu is open with the 'STORES' icon highlighted. The 'Stores' window is displayed, showing a list of configuration options on the left and a detailed view of the 'Configuration' option on the right. The 'Configuration' option is highlighted with a red box. The right panel shows settings for Tax (\$0.00), Shipping (\$0.00), and Quantity (0). Below these, there are tabs for 'Viewed Products', 'New Customers', and 'Customers'. A table lists products with their prices and quantities.

	Price	Quantity
	\$99.00	100
CK Water Proof D6603 4G LTE Unlocked	\$336.00	63
	\$234.00	46
8 Notebook	\$36.00	42
9 Notebook Computer (Mid 2012)	\$36.00	21

✓ Step 2: Uninstall

- In Configuration window, click on **ADVANCED** -> select Advanced
