Product Quick View Magento extension is a perfect solution to minimize the time spent by customers on your site when they click on any product to view its details. So now customers do not have to go back and forth on category listing and product pages as many times as they click on any product. Instead, this Magento extension displays the necessary product information to customers in a light box once they click on Quick View icon.

Magento Quick View extension is a great feature to enhance users experience browsing your store. Magento Quick View prevents users from reloading pages to see full description and allows them to instantly buy products without wasting time or risks to leave pages due to slow loading. If a description is too long, a slider will be used to manage it.

### ➤ System Requirements:

#### \* **Operating System:**

- Linux as RedHat Enterprise Linux (RHEL), CentOS, Ubuntu, Debian, v..v
- Composer (the last version)
- Apache 2.2 or > Apache 2.2
